

Which treatment is suited for you?

MEDICAL NEEDLING

Thousands of tiny punctures are created in the skin, inducing the release of growth factors to stimulate the production of new collagen and elastin. Product penetration is also improved leading to enhanced rejuvenation.

- Treats:** Fine lines and wrinkles, uneven skin tone, acne scarring, burn scars, irregular skin texture and complexion.
- Results:** Tighter skin, improved scars, improved texture and complexion.

HYDRAPEN

The Hydrapen is a fractional mesotherapy device that assists with skin rejuvenation. It utilises the micro-needling technology while including a capsule filled with a specialised serum, that is micro-injected into your skin. This needling action assists with the stimulation of collagen and elastin production and enhances cellular renewal, while assisting in the treatment of your skin concern. The needles form micro-channels in the skin, which helps the penetration of more than 80% of the active ingredients into the skin – far more than if you were to apply a serum topically.

- Treats:** Signs of ageing, Irregular skin texture, Hyper-pigmentation and Dehydration
- Results:** A nourished, revitalized, glowing skin

PRP (PLATELET RICH PLASMA)

Platelet Rich Plasma is derived from your own blood. This plasma has powerful reparative properties, enhances collagen production to reduce signs of ageing and begin the rejuvenative process within your skin. The process involves drawing your blood into a patented syringe and then inserting the syringe into a state-of-the-art Arthrex centrifuge machine, whereby it is spun to separate the plasma from the blood. The plasma is then drawn up within the sealed syringe unit and applied to skin while performing medical needling to further the penetration and stimulate collagen production. A course of four treatments, at one treatment per month, is recommended for best results.

- Treats:** Irregular skin texture, signs of ageing and scarring.
- Results:** Revitalised, glowing skin with improved texture and reduced signs of ageing.

SKIN PEELING SYSTEMS

These peels contain high concentrations of alpha/beta acid ingredients with minimal to moderate downtime.

- Treats:** Irregular skin texture, fine lines, acne scarring and pigment irregularities.
- Results:** Textural improvement, even complexion and revitalised skin.

SKINCEUTICALS TREATMENTS

SkinCeuticals is born from decades of skin cancer research. These high potency formulas are concentrated with pure actives proven to optimally penetrate the skin. This is advanced skincare, backed by science.

ENVIRON ELECTO-SONIC TREATMENTS

This involves the intense penetration of active ingredients with the use of sonophoresis (ultra sound) and iontophoresis (micro-current).

- Treats:** Dehydration, fine lines and photo damage.
- Results:** A glowing healthy complexion and skin nutrition.

LASER

By utilising the state-of-the-art Cynosure Icon medical laser platform, we are able to target a wide variety of skin concerns. Deemed one of the most powerful medical lasers on the market, this platform provides more comfortable treatments with highly effective results.

Photo Rejuvenation (Max G/YS)
Treatment of pigmentation and vascularity.
(3-5 treatments recommended)

Facial Rejuvenation (1540/Non-ablative fractional laser)
Treatment of fine lines, wrinkles and hypertrophic scars and melasma.

RAPID HEALING PROGRAMME

Omnilux Revive Light treatments are proven to reduce post-operative healing time by up to 50% and improve the appearance of scars. A course of 8 treatments commences after your post-op appointment.

PLEXR TREATMENTS

The Plexr device uses technology to create Plasma in order to vaporise the outermost layers of the skin, without transferring unwanted heat and damaging adjacent tissues, preserving the deeper layers. This is used to tighten areas of facial skin laxity such as eyelids and perioral lines with moderate downtime.

LAMPROBE TREATMENTS

Based on radio wave and high frequency technology, the Lamprobe works on the principal of liquids being attracted to heat, released by various sized and shaped probes for the treatment of all types of different lesions. What distinguishes the Lamprobe from other devices, is the delicate yet sophisticated regulated intensity focusing on the lesion alone and not the underlying or surrounding skin.

Treats: Skin tags, Fibromas, Seborrhic Keratosis, Sebaceous Hyperplasia, DPN, Angiomas and small spider veins on the face

MASC SIGNATURE TREATMENT

This specialised treatment combines the best of our treatment selection to revitalise, hydrate and plump your skin.

We start with a light, superficial chemical peel that removes surface dead skin cells and increases cell turnover within the epidermis. An intensive anti-ageing peptide-based serum is then applied and infused into the skin. This is followed by a mask that assists in improving elasticity, skin firmness and hydration. A gentle massage on the face and décolleté soothes and calms the skin in preparation for our Omnilux Revive light. This 'near infra-red' light enhances collagen and elastin production, promotes healing, whilst mildly stimulating the micro-circulation within the skin.

Lastly, we apply a moisturiser suited to your skin type, a broad spectrum sunscreen and Lycogel treatment foundation. You leave with a glowing, radiant skin, ready to face any event.

AQ SKIN SOLUTIONS GROWTH FACTOR INDUCTION THERAPY

A game changer in skin rejuvenation, this treatment uses a medical needling modality to facilitate the penetration of a powerful, high-level dose of bio-identical growth factors. These ingredients can assist in restoring the dermis and epidermis to a more youthful state by increasing collagen, elastin and hydration thereby decreasing the appearance of fine lines and wrinkles.

- Treats:** Premature and active signs of ageing, photodamaged skin, scars and mild acne.
- Results:** Diminished fine lines and wrinkles, glowing and more youthful looking skin, fading of sun/age spots, skin function restored to repair damage within the skin.

Turn over a new leaf

The **MY MASC loyalty programme** rewards you with a fresher, younger-looking skin. Starting with the root of your concern, our expert skincare therapists will create a 12-month skin rejuvenation plan tailor-made for you. Every treatment is selected to compound and maximise your results. And just like a tree that shakes off its leaves in autumn to welcome new shoots in spring, MY MASC will rid you of old, tired skin to reveal a healthy, glowing skin beneath.

WHEN YOU JOIN, YOU RECEIVE

- Visia **skin analysis**
- Personalised **12-month skin regimen**
- Welcome pack** (make-up bag and calendar)
- 15% off** a starterpack of three products
- R300 off** your first treatment
- Exclusive invitation** to our Naked Truth Event
